

Mediboyina Sai Koushik

Hyderabad, India — 2026 Passout
saikoushik2k4@gmail.com — +91 9553740807 — GitHub — LinkedIn

Professional Summary

Final-year B.Tech Computer Science student with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in backend development using Java, Python, and Node.js with database integration using MySQL and MongoDB. Skilled in building REST APIs, debugging applications, and developing scalable software systems. Passionate about writing clean, efficient code and solving complex engineering problems.

Technical Skills

Programming Languages: Java, Python, JavaScript, C++.

Software Development: Object-Oriented Programming, Data Structures, Algorithms, REST APIs, Backend Development.

Frontend Development: React.js, HTML5, CSS3.

Databases: MySQL, MongoDB, Firebase, Psql.

Tools: Git, GitHub, Postman, VS Code.

Experience

Software Developer – Leap India

Jun 2025 – Present

- Developed backend modules for a construction project management platform using Node.js, Express.js, PostgreSQL, and REST APIs.
- Optimized task management workflows and application performance for large-scale project operations.
- Implemented role-based access control and authentication mechanisms to secure user access.
- Built real-time collaboration features using WebSockets for instant task and approval updates.
- Collaborated on debugging, API integration, testing, and feature development using Git workflows.

Front-End Development Intern – EduNet Foundation

Jun 2024 – Aug 2024

- Developed responsive user interfaces using React.js and modern JavaScript.
- Integrated frontend components with backend APIs for dynamic data handling.
- Participated in debugging, UI improvements, and feature enhancements.
- Collaborated with team members using Git and GitHub.

Projects

ATM Management System (Java, MySQL)

- Developed a banking transaction system simulating ATM operations including authentication, withdrawal, deposit, and balance inquiry.
- Designed object-oriented modules for account management and transaction processing.
- Integrated MySQL database to store account information and transaction records.
- Implemented input validation and exception handling for secure transactions.

Distributed Task Manager (MERN Stack)

- Built a full-stack task management platform using React.js, Node.js, Express.js, and MongoDB.
- Designed REST APIs to manage tasks, users, and project workflows.
- Implemented authentication and role-based access control.
- Optimized backend logic for efficient data retrieval and task updates.

Smart Expense Analyzer (Python, Machine Learning)

- Developed a machine learning model to analyze user spending patterns and predict future expenses.
- Performed data preprocessing, feature engineering, and model evaluation.
- Implemented visualizations to display spending trends and financial insights.
- Applied predictive analytics for financial decision support.

Education

B.Tech – Computer Science and Engineering

2022 – 2026

SRM University AP

CGPA: 7.14 / 10

Certifications

- IBM SkillBuild – Front-End Development
- AWS Cloud Fundamentals – Coursera
- Foundations of Cybersecurity – Coursera
